The diagram illustrates a memory hierarchy and data flow. A yellow parallelogram represents the system. Inside, on the left, is a light blue rectangle labeled 'A'. To its right are three horizontal pink rectangles, each also labeled 'A'. A double-headed white arrow connects the blue rectangle to the top pink rectangle. A long white arrow points from the bottom of the blue rectangle down to a horizontal line outside the yellow area, which is also labeled 'A'. The text 'READ/WRITE' is at the top and 'INPUT/OUTPUT' is at the bottom of the yellow area.
